Mr GILBERTO GIL

Ministry of Arts

BRAZILIA

BRESIL

Le 27-5-2008

Gilberto Gil.

my husband phoned to the Hospital and they found the results ^{of the scanner} but did not analyse it.

We took an appointment with the doctor -

What I don't understand that since more an hour I am like a painful puppet - my back bent up the right side and my head bent - I don't understand the reason. If they want to make me understand that the day of the appointment they would do the same and I could not accompany him and the women more would take him away. ~~They~~ Fucking doctors are so perverse or because I told to my family the show business could have taken the results. Criminal organizations are the most sadique and perverse

When I went to Paris they can they make me the same pain in the back but I was not bent neither my head -

I don't see no other reason they put me in such a state this operation is in a bad moment - But they can do

the same put me in a crazy state anymore if something else they can do everything to the brain. Usually we are always together - they can do the same thing if we have to go shopping but it's easier because the appointment has been done by telephone - And the festival would be still here I am sure that that Sunday at 194 port they put me like a robot because before they put turning on myself

When in the afternoon I wanted to put my shoes on -
to my husband who is not naive politically is like
G. Clooney. But if ~~in~~ within a week he would have
all the symptoms I had and here he would immediately
change of "way of thinking" - But that's impossible absolutely
They⁶ can put in like a painful puppet when my husband
would go to the appointment with the doctor -

the Secret services could have tried to ~~could have put~~
backers or tried to know something in the part of the
army but nobody asked them. - Newspapers prefer
to talk about the political things (and there are a lot) or
talk about the private life of the President now that
the mafia has this fucking satellite and doctors
are more powerful than 'all the governments' -

It's impossible to get the mor--- or these strongest
pulls to sleep for me. Even they can stop me doing everything
I could have try - when they make make the lines
with my nail on the eyebrow, around the neck, the
how they make me touched a tooth little to talk it off

In all cases it's the end - and I beg you to excuse me
to write you still. The young people and older (obacco shop for
example) ~~how~~ from the little city knows about my situation
I would be killed but they don't know about the satellite - they
are in a little level of knowing about the criminal organization
in the village and towns around) - I don't know when I could
post this letter. They can do anything if I accompany him to see the doctor -

Wishing you a good following - have -
the person ^{who} make the crime would be a psychopath -
SHIPS and private planes are creating -

A Boy Boat ^{of 3 little windows} swims on 3 lights one after another very quickly
at the ~~at the~~ end of the show TV about comes on comes.

The appointment of my husband is on Thursday... really
wonder if I would accompany him
or if I accompany him they can put me even in crazy state
amnesic or like a puppet, and ~~really~~ really ~~also~~

don't know if you would get this letter.

If I don't accompany him they would take him away
they're make, like a ^{nausea} puppet today still so I can't go out -

I ask to my husband to go to the post office - He has to go
for him - I am sure he would be operated in another country USA or
the big boat which lights 3 times is waiting into all the
show broken more and the actives -

I have got "trailements" in the head and my back is bent
with a great pain my head bent and I walked with
very little paths - Suddenly I was sitting in the garden
and when I stood up I am like that -

How few all kind of people can think I am crazy,
when it's coming from this satellite with his monstrous
technology - And when I am sitting I have difficulties to breathe.

I am going to stop to disturb you with all that
wishing you a good following -

Laure -
